

Case Study World Class Maintenance

Realising the Vision at Trader Media Group

"The input and advice received from EMS on key projects has been invaluable - it is encouraging that management wish to take ownership and drive a number of the projects to a conclusion."

Alan Turner, MD, 2006

Problem

Alan Turner, MD, 2004: "We are working in a market place in which there is over capacity and depressed print prices and therefore failure to deliver on time can spell the end for businesses such as ours."

Solution

EMS was engaged to lead a change programme in lean maintenance commencing with diagnostic audits at the production sites. Key projects included CIL (autonomous maintenance), Critical Spares Analysis, 5C & organisational re-design.

Results

Alan Turner, MD, 2006: "All managers agreed - the input and advice received from EMS on key projects (CIL being a prime example) had been invaluable."

About the Programme

This was a tailored multi-site programme of Lean Maintenance & Lean Manufacturing projects stemming from an initial maintenance audit of the production operations. The maintenance audit allows comparison against industry best practice and identifies opportunities for equipment reliability improvement.
